PROFIT/(LOSS) FOR THE SEMESTER ALLOCATED BY COUNTRY

PROFIT FOR THE SEMESTER ALLOCATED BY CLUSTER

*FY22/23 numbers include results for period 1 Jul 22 to 30 Sep 22 as the East African assets were transferred to MIWA Sugar Limited from 1 Oct 22

FINANCIAL PERFORMANCE REVIEW

GROUP SUMMARY

Note: Alteo completed its restructuring into two distinct listed groups in the second quarter and all East African operations (up until Q1 of FY22/23) are recorded as discontinued operations (see note below).

Alteo's continuing operations saw encouraging revenue growth of Rs 706m to reach Rs 2.9bn for the half year ending December 2022. This was driven by a higher price of sugar, albeit curtailed by a reduced tonnage of cane harvested and crushed. Income from the property cluster also saw significant growth for the period with recovering resort and golf operations as well as part of the Mont Piton 2 residential programme sales being recorded in the current financial year. Revenue from energy operations was also up due to the higher price of coal.

Normalised EBITDA fell by Rs 27m to Rs 672m on account of ongoing inflationary pressures on operational costs, especially inputs and freight. Corresponding profit however grew by Rs 13m to Rs 475m, driven largely by the flow-through impact of higher property sales and reduced finance costs following a material debt repayment and restructuring. This improved performance also had to contend with significant drag from lower profitability in agro-business and energy activities on account of higher production costs.

The net bottom line of Rs 1bn includes discontinued operations which stopped at Q1 for the current financial year. Comparatives for last year include results from two quarters.

The movement in shareholder and non-controlling interests on the statement of financial position reflects the restructuring of the East African operations. This also resulted in the removal of assets and liabilities held for distribution and the recognition of Rs 950m of receivables in relation to a debt transfer.

AGRO-BUSINESS

Sugar prices maintain revenue growth despite lower production, with inflationary pressures denting profitability

The cluster benefitted from higher sugar prices (Rs 6k per tonne higher) which boosted revenue by 9% to Rs 1.7bn across its agricultural and milling operations, despite a significant fall in production. Ongoing inflationary pressures, as well as the reduced cane tonnage, meant that profitability was significantly dented with the cluster recording a swing in profitability of Rs 118m in Q2 and ending the semester Rs 72m lower than last year at Rs 254m.

ENERGY

Reduced bagasse availability and a switch to coal reduce profitability for the cluster

Energy production remains steady with 91 GWh exported to the grid, roughly on par with last year. In line with the poorer cane harvest, reduced availability of bagasse meant a switch to coal for production. Due to the plant's lower efficiency on coal, this higher use of coal saw profitability decrease by 43% to Rs 26m.

PROPERTY

Delivery of residential sales and recovering operations boost revenue and profitability

As disclosed in Q1, the Property cluster benefitted from the tail end of the Mont Piton 2 residential deliveries and recovering tourism (in its resort and golf operations) to post a material growth in revenue of Rs 341m to Rs 679m. Profitability also rose by Rs 104m to Rs 195m including the flow-through impact of enhanced revenue from operations and gains on disposal of bulk land sales.

OUTLOOK

The Group's property operations continue to show significant promise, but Agro-business and Energy operations are expected to see cost challenges endure into the second semester

The Group's property operations remain focused on converting the healthy demand of high-end residential properties at Anahita. The Group will also pivot its expertise into the active marketing of the Anahita Beau Champ smart city project, due to begin in the second half of the financial year. Several key projects have been identified to contribute to the continued sustainable development of the East and these will be announced in due course.

With the reduced tonnage of cane harvested this year, profitability in the agro-business and energy clusters will continue to be impacted by cost pressures, however, management remains committed to optimise its operations in order to cushion these effects.

RESTRUCTURING UPDATE

Alteo completed its restructuring in Q2 with all East African operations now included under a separate listed entity (Miwa Sugar Limited). Shareholders should refer to the relevant communications issued to the market by both groups for further detail.

By Order of the Board
13 February 2023

Notes: The condensed financial statements for the 6 months ended December 31, 2022 are unaudited and have been prepared using the same accounting policies as the audited statements for the year ended June 30, 2022.
This notice is issued pursuant to SEM Listing Rules 11.3 and 12.20.
The Board of Directors of Alteo Limited accepts full responsibility for the accuracy of the information contained in these condensed financial statements.
