The abridged audited consolidated financial statements for the year ended 30 June 2023 have been extracted from the annual consolidated financial statements which have been prepared in accordance with the Mauritius Companies Act 2001 and the Financial Reporting Act 2004 and comply with International Financial Reporting Standards, taking into consideration all revised IAS and new IFRS effective for accounting periods beginning on 1 July 2022. The independent auditors' report to the consolidated financial statements is unqualified.

Year on year performance highlights

Comments

The Board of IBL Ltd hereby presents the Group's audited abridged financial statements for the financial year ended 30 June 2023. The financial highlights have been prepared in accordance with International Financial Reporting Standards (IFRS) and on the same basis as the accounting policies set out in the audited statutory financial statements for the year ended 30 June 2023.

Summary for the financial year ended 30 June 2023

Group revenue for the financial year ended 30 June 2023 rose by 20% to reach Rs 54.1 billion (FY2022: Rs 45.0 billion). Operating profits reached Rs 4.2 billion, representing an increase of 24% over the previous year. Profit before Tax (PBT) from the Group doubled to reach Rs 5.5 billion. Results were significantly higher across most of our clusters this year.

Sectorial review

Agro and Energy: Alteo's increased profit is driven by its Property cluster which recorded a fair value uplift in investment property. The Agro-Business cluster benefitted from higher prices of sugar and saw an increase in revenue despite lower production volume in Mauritius. Kenyan and Tanzanian operations via Miwa Sugar Ltd, which spun off from Alteo in December 2022, benefitted from rising sugar prices. Record production levels were reported in Tanzania and Kenya. IBL Energy Group is still at a nascent stage and is growing in line with its defined strategic plan, already reaching 45Mw under management in East Africa.

Building and Engineering: The sector recorded an overall increase in operating profits of 61%. A significant turnaround was achieved by Manser Saxon, which registered improved performance across all segments. Better operational efficiency and new contracts contributed to this positive momentum. UBP also reported higher profits across its three business lines. The core operations benefitted from higher sales volume for both aggregate and mortar. The retail and agriculture sub-segments also performed better. CNOI registered double-digit growth in revenue, but overall profitability was subdued by lower margins.

Commercial and Distribution: Operating performance for the sector increased by 31% overall. PhoenixBev registered an increase in operating profit of over 50% thanks to an increase in sales volume but also because last year's results had been adversely impacted by COVID-19 and expenses relating to M&A activities. BrandActiv posted strong results, driven by volume growth for existing products and a larger product offering. Winners delivered double-digit growth in both topline and profitability. The flagship store at Tribeca opened in late December 2022 and has gained excellent traction, although the mall is not yet fully operational. At the beginning of the financial year, IBL acquired a significant stake in Naivas, the largest supermarket chain in Kenya. Naivas registered a robust performance during the period under review, and the current upward trend is expected to continue. Naivas will be opening its 100th store in October 2023.

Financial Services: Sector profitability improved, mainly with better results from AfrAsia Bank. The high interest rate environment and foreign exchange volatility are beneficial for banks. Coupled with an increase in their loan book, AfrAsia's profitability has increased significantly. Eagle Insurance has been deeply impacted this year with a high claims ratio. DTOS Group also experienced a small decrease in profitability due to increases in staff costs in relation to cross-border expansion projects. City Brokers registered an improved performance, led by a significant increase in its net brokerage income.

Hospitality and Services: LUX* has posted significantly improved results following the end of the global pandemic. Both occupancy rates and room revenues have risen considerably. The fire outbreak at LUX* Belle-Mare in early July-22 led to an impairment loss on the property and substantial closure costs. However, LUX* was able to recover a significant part of the losses incurred on the building and on its loss of earnings from its insurers. The Lux Collective (TLC) pursues its upward trajectory with a significant increase in normalized profit thanks to new management contracts.

Life and Technologies: CIDP registered a growth in turnover driven by the cosmetic segment but was impacted by rising costs, leading to decreased profitability. The other companies in this sector (Nova+, Novalab, and Viva) are still in the incubator phase, with ramp-up costs being incurred.

Logistics: The Aviation segment benefitted from the reopening of borders and the resulting surge in travel and tourism. The Shipping segment performed better with an increased number of charter-hiring days and more vessel calls. Logidis improved its operational performance but was affected by one-off costs. Somatrans posted stable performance despite lower freight rates.

Property: Excellent results for BlueLife are derived primarily from its property segment. The completion of phase 1 of the Ennea and Amara projects, as well as Ocean River Villas, led to better results. BlueLife's hospitality segment benefitted from the re-opening of borders. Bloomage maintained high occupancy rates. The company registered a boost in turnover, driven mainly by higher rental rates on some properties.

Seafood: Cluster performance was significantly higher than previous years due to good results for all subsidiaries. The combined operating profit and share of profits from PTM add up to Rs 600 million for the first time in the cluster's history. Revenue for MBP and MBPCI in Ivory Coast is driven up by higher sales volumes for both fish meal and crude oil, as well as higher prices. Cervonic also registered healthier results with better production yields. Good performance from PTM is driven by higher sales and cost optimisation.

Outlook

IBL is in an expansion phase, and the above results have been achieved both through organic and inorganic growth. Results are set to increase in the coming year following the consolidation of Naivas and investments made in energy and healthcare sectors. Concurrently IBL is focusing on its financing needs to support the IBL Beyond Borders Strategy and its 2030 strategic vision.
