- The condensed unaudited financial statements for the half year ended 31st December 2019 have been prepared on the basis of accounting policies set out in the statutory financial statements of the group for the year ended June 30, 2019, except for the adoption of relevant amendments to published standards, standards and interpretations issued now effective.
- The Group's turnover from continuing operations for the half year under review amounted to MUR 878m and was MUR 77m higher than last year. Agriculture revenue exceeded last year's by MUR 5m due to higher cane tonnage and extraction rates, albeit tempered by a lower yield on food crops due to poor environmental conditions. The growth of the Property real estate portfolio generated additional operational income, excluding land sales, of MUR 34m that contributed to increase overall revenue to MUR 168m. The Leisure cluster has seen an increase of MUR 44m in revenue primarily due to the consolidation of a full year of Concorde's results following its acquisition in December 2018, with underlying revenue significantly impacted by the adverse performance of Casela Nature Parks which has seen a drop in its number of visitors. The Education cluster to date has seen reduced income over last year of MUR 5m, caused by fewer executive sessions organised - these operations are expected to recover by the end of the financial year.
- The Group's profits for the period amounted to MUR 5m, representing a decrease of MUR 37m over last year. The Agriculture cluster posted profits of MUR 20m (2018: loss of MUR 18m), having reduced its operational cost base and benefiting from a fair value gain on biological assets due to an increase in the price of sugar. The Property cluster also saw increased profitability of MUR 7m (2018: MUR 115m), driven by an increase in land sales and a larger real estate portfolio. Leisure and Education cluster profitabilities were impacted in line with the same factors affecting revenue detailed above, with Leisure seeing a swing of MUR 18m to book a loss of MUR 11m this year and Education underperforming last year by MUR 3m.
- Despite the lower than expected profitability at half year partly explained by the uneven nature of land sales realisations, Management remain optimistic, given the current pipeline, on the Company's outlook to the end of the financial year and beyond.
- Caution should however be exercised in the analysis of the results of the group in view of the seasonal nature of the sugar related operations and the mismatch of revenue and expenses as these are not evenly spread over the year.
- Discontinuing and discontinued operations relate to the closure of the Mill and the poultry farms which have been leased to an operator. In addition, the golf and hotel operations have also been reclassified to reflect the Group's intention to seek an external operator to lease these operations.
- An interim dividend of Re 1.05 per ordinary share totalling Rs 110m was declared on the 18th of December 2019 (2018: Rs 152m) and will be paid on the 17th of February 2020.
