

NEAR ON-LINE TRADING

Now that confinement has been extended for another two weeks to the 4th of May, which means that we would be trading on the exchange through the one platform only being accessed by only one dealer. In order to alleviate the burden and reduce congestions as far as possible, we have decided to activate a near on-line access, for clients who wish to, through **My SEM** near on-line trading platform, which then links to our execution platform.

We invite those who are already connected to the My SEM platform and who have in their possession an ID and login password to use the facility. Those who are not yet connected to My SEM can contact one of our traders, in order to proceed.
